

3M™ ACCENTRIM™ TAPE

CREATES THE ILLUSION OF BEVELLED OR BRILLIANT CUT GLASS

Accentrim tapes create the illusion of brilliant cutting or bevelling by reflecting and refracting light that passes through them. They add a contemporary decorative effect without sacrificing natural light and without the cost and technical limitations of more traditional techniques.

APPLICATIONS

Window and door designs can be created in a variety of patterns to meet architectural and domestic glass requirements, enhancing the view from inside and out. Even patio doors, commercial access doors and other large areas of glass can be decorated cost effectively.

Interior applications include internal doors, mirrors, kitchen cabinets and furniture. Accentrim tapes allow the creation of decorative effects that are not possible with traditional bevelling and brilliant cutting, as they do not require heavy gauge glass. They can be used alone or combined with RegaBevels, RegaLead and Stained Glass Art Film.

Accentrim tape can be used on its own...

B100 Bevel edge border with A300 Fluted V Groove creates a multi-faceted cabinet door.

B200 tape used to create a faceted V Groove effect in a door

...or with other RegaLead products.

B100 Bevel edge with RegaLead self adhesive lead creates the look of a 6 panel divided light. The same effect can be created with Georgian bar and Accentrim.

Combining lead and film with B200 V Groove creates a traditional border bevel appearance on a fanlight.

3M™ TECHNOLOGY

Accentrim tape can be applied to any thickness and size of material without structural limitations. The permanent aggressive acrylic adhesive provides excellent adhesion to glass and also adheres to a wide variety of surfaces including toughened glass and polycarbonate.

PRODUCT RANGE

3M™ ACCENTRIM™ TAPE IS AVAILABLE IN FOUR STYLES.

B100 EDGE BEVEL

Creates the illusion of a bevelled edge.

A300 FLUTED V GROOVE

Gives the appearance of brilliant cut "V" Groove with the addition of a fluted centre line.

B200 V GROOVE

Creates the illusion of brilliant cut "V" Groove without the expense of cutting, or pencil beveling.

A400 HALF ROUND FLAT CENTRE

Two half round edges with a flat centre line, gives a faceted appearance.

3M M90 PRECISION CUTTER

Accurately cuts Accentrim strips to specific lengths and 30° 45° 60° and 90° angles.

3101 HAND CUTTER

Ideal for cutting 45° and 90° angles. A cost effective option.
